EDUCATION

Royal Melbourne Institute of Technology (RMIT UNIVERSITY VIETNAM),

2023 - Current

Bachelor of Business (Economics & Finance Major) | Ho Chi Minh City, Vietnam

Core Coursework: Big Data ML & Society, Basic Econometrics, Equity Investment & Portfolio Management, Corporate Finance, Financial Markets & Institutions, International Finance, Macroeconomics for Decision Making.

PROFESSIONAL OVERVIEW

Economics and Finance undergraduate at RMIT University Vietnam with strong academic grounding in quantitative analysis, econometrics, financial modeling, and applied machine learning. High Distinction (HD) achiever in Big Data & Machine Learning with practical experience constructing Python/R data pipelines, credit default classification models, and Excel portfolio optimization models. Seeking entry-level or graduate rotational opportunities in Financial Analytics, Risk Advisory, Credit Risk, or Business Intelligence to deliver data-driven insights in real-world commercial settings.

SELECTED QUANTITATIVE PROJECTS

Vietnamese Real Estate Price Prediction

2025

Python, Decision Trees, Random Forest, Regression Analytics, Group Project

- Co-developed a predictive valuation pipeline in Python for a Vietnamese property market dataset as part of a four-person quantitative team.
- Trained and hyperparameter-tuned Decision Tree and Random Forest regression models, optimizing cross-validation accuracy for automated property price prediction.
- Delivered a reproducible Python workflow and analytical presentation deck, translating feature importance metrics into clear commercial insights for property valuation.

Governance, Institutions & GDP per Capita

2024

R Programming, OLS Regression, Diagnostic Testing, Macroeconomic Policy

- Formulated multivariable OLS regression models in R evaluating World Bank governance indicators, foreign direct investment (FDI) inflows, and GDP per capita across cross-country panel data.
- Evaluated log-linear model specifications and interaction terms, conducting heteroskedasticity and multicollinearity diagnostic tests to ensure robust statistical inference.

Equity Investment & Asset Allocation Analysis

2024

Microsoft Excel, Modern Portfolio Theory (MPT), Efficient Frontier Optimization

- Developed Modern Portfolio Theory (MPT) spreadsheet models in Excel, computing asset variance-covariance matrices, plotting efficient frontier curves, and deriving optimal Sharpe ratio weights.
- Analyzed diversification benefits and risk-return trade-offs across multi-asset portfolios to support quantitative investment decision-making.

TECHNICAL SKILLS & COMPETENCIES

- **Data Analytics & Programming:** Python (pandas, scikit-learn, NumPy), R Programming, Jupyter Notebooks, RStudio, Exploratory Data Analysis (EDA), Data Preprocessing, Machine Learning Classification & Regression.
- **Econometrics & Statistics:** Multivariable OLS Regression, Hypothesis Testing, Diagnostic Testing (Multicollinearity, Heteroskedasticity), Causal vs. Predictive Analysis, Time-Series & Cross-Country Analysis.
- **Finance & Risk Analysis:** Modern Portfolio Theory (MPT), Efficient Frontier Construction, Asset Allocation, Credit Risk Modeling, Corporate Finance, Capital Asset Pricing Model (CAPM), Financial Market Analysis.
- **Software & Developer Tools:** Microsoft Excel (Advanced Modeling), Git, GitHub, n8n Workflow Automation, Markdown.

ACHIEVEMENTS AND OTHER INFORMATION

CERTIFICATE

Innovation for Global Cities by RMIT (2024)

RMIT Big Industry Challenge HCMC (2024)

IELTS (Overall band of 7.5)

LANGUAGES

Vietnamese (native); English (fluent)
